

STANDARD PROGRESSIVE LENSES

VERSIO **S** A variety of fitting heights - 14,16,18, power ranges and materials for the patient that wants a good value.

PREMIUM PROGRESSIVE LENSES

VERSIO **U** Offers wider viewing area, enhanced distance. Smooth intermediate and reading with easy adaption. Latest technology.

VERSIO **V** Offers the ultimate in visual comfort. Unique lens technology, customized to meet your needs. This lens offers the widest viewing area, and smoothest transition from one field of focus to the next.

LIFESTYLE PROGRESSIVE LENSES

VERSIO **driver** Specialty designed for the patient that drives 4 hours or more a day. Wide and clear distance and improved middle viewing areas for reading dashboards and seeing in mirrors.

VERSIO **office** Designed for the patient that works with a computer for 3 or more hours a day, ideal for all reading additions up to 3.0. Fully corrected reading and intermediate vision and maximized distance viewing.

VERSIO **relax** A progressive designed for non-presbyopes. This design reduces visual fatigue and eye strain if you spend a large portion of the day focusing at the same distance. For patients that are sensitive to light, glare or work in artificial light and pre-presbyopes.

VERSIO **DLP short junior**

Designed for young people between the ages of 8 and 16 years. Offers large stable reading area combined with excellent peripheral clarity and distance zones.
